This is a clear scope skin I created some time ago.

Just put it in your data folder.

File Attachments
1) Clear_Scope02.rar, downloaded 360 times
2) clear_scope02.png, downloaded 1072 times

I think Zunnies name appears as the author because he uploaded it. It's likely better descirbed as "uploaded by", but probably an issue with the file management system they use.

Nice, i'll be using that. This is a nice alternative to using the lame "blank" clear scope. Looks clean.
