I need someone who has a 100% stock copy of Renegade 1.037 and who has never had any scripts or modified mix files etc installed on it (doesn't matter if its a original retail disc, a First Decade copy or an Ultimate Collection copy although I need it to be an English version) to play the single player mission with the big dam ("Armored Assault" is what the game calls it) until they reach the room with the tiberium meteorite and make a save game the moment they enter the room BEFORE the spiel about how its a meteorite crater and to avoid the tiberium plays and BEFORE the Apache starts making the helicopter noises.

Having a stock 100% guaranteed free of scripts save game from this location will allow me to confirm exactly whats going on with a glitch in this area affecting the custom scripts.

Here ya go, stock TFD (english) with no scripts applied.

I saved it just before the point you're given the objectives for that area (pretty much take a few steps forward and you are given those objectives), let me know if this works or if you'd like a save at another point.

File Attachments
1) ArmoredAssault_BeforeObjectives.zip, downloaded 231 times
