Every time I close ren my settings don't stay. Even when saving them, they are not there when I try to load my settings. Any ideas?

I'm not sure. Try deleting all input.cfg files from your client folder. If that doesn't work, try deleting config.dat which is in the same folder. I'd make a copy of that file if it doesn't reappear after restarting the game.

Run the config in admin mode.

never heard of ingame settings not saving...

I'd delete everything and reinstall, if what yesnomaybewhatastupidname says doesnt work

Run the config and Renegade as admin.

Did you try my previous suggestion?
