Does anyone have a downlaod for a custom strings.tdb file which shows "Stealth Black Hand" instead of "Black Hand" for SBH?

Can you also make it show Black hand sniper for the sniper and/or black hand LCG for the Laser chain gunner?

Unfortunately those two are both linked to the same generic blackhand string even though there are actually 4 blackhand strings in the strings file. I corrected that issue on my server with a custom objects.ddb but it can't be done with just a strings file alone.
