my game was playing, before the Jelly server went away i havent played online in a long time. I tried to log in, the servers come up, but when i try to log into any server the game crashes. doesnt matter which server, are there any updates i am missing to play online? i just want to do the co op games i see listed

You probably need to update your game with the most recent scripts from TT. Go to <http://www.tiberiantechologies.org> and complete the download of the most recent scripts. Any issues post back here and you will get help.

Welcome back soldier, now get updated and in the servers so we can kill you.
