First Ever Command & Conquer Rom Altercation.

All Mission maps and all variants redone! only problem is not all the Spec ops missions work right now.

Also i fixed doubles that were in the game for example GDI Mission 4 now actually has 4 Variants not 3 and GDI Mission 13 has 2 Variants not 1.

Only thing I don't like is the color of the bibs, otherwise it looks real good!

Hahah you're right the bibs were a little elaborate i was sort of just experimenting when i did them i probably should of removed them or simplified them but thanks

What emulator do you recommend?

Good question!

I recommend project 64 preferably 1.7 I find it's the easiest to use and has the most flexibility:

<http://www.mediafire.com/file/zne2z9brg9w46mb/Project64+1.7.zip>

That's odd really? i should work especially with Project 64 1.7 or even the new one, which emulator did you use?

I meant to say that I* used Project 64.

I'll download a different one to try again later and let you know how it goes.

It worked really well. The intro scenes would often crash and I'd have to force restart the game and there were occasional times when the controls just wouldn't respond or would cause the game to crash. It was intermittent but still fun to have running again.

Thanks for putting the time and effort into it

Yes with this mod always skip the intro scenes when going into a mission. The reason it crashes is because you know in the intro briefing talk they show pictures taken from the campaign intros as image frames for example :

These images were so big in size i could take a hex editor and delete/replace these images with large size maps making more room to fill the game with more Missions/Levels. Also all the campaign missions in this modded N64C&C have the same objective which is destroy the enemy base. there are no missions where you have to capture something to win for example so always skip the intros because they don't line up with the new mission maps anyway

So when you're finishing one mission and moving onto the next, or if you're just clicking to play a specific mission, as soon as the briefing starts just click A to skip it because whatever the voice says and starts briefing you (because N64 C&C doesn't have the briefings in full video) doesn't matter anyway because it's not in sync with the missions you're playing since i remade all of them obviously.

Too bad we couldn't have inserted our own briefings into the game but we didn't get that far in the sense that I don't know how to insert audio into the rom.

When it comes to inserting things from the original C&C me and Nyerguds(who i owe extra credit to) weren't able to get that far

Much credit goes to Nyerguds actually He's the one who works with CNCnet and he's the one who Patched the original C&C so it would work better and more modern for everyone who wants to have a lan game of C&C and etc. here:

[url\]http://nyerguds.arsaneus-design.com/cnc95upd/cc95p106/\[/url\]](http://nyerguds.arsaneus-design.com/cnc95upd/cc95p106/)

I'm mostly the mission/map maker so my briefings for the maps I've made are all the same and that is to "destroy all enemy bases and units".

I could have made maps with a uniq objective like to capture a curtain building with an engineer but i haven't quite figured out how to change the breifing part yet.

Oh and go with a remote control i recommend this type of remote:

Or ifff you still have N64 controllers:

You can find these converter extenders on ebay or amavon for a reasable price

I use a wired XBOX 360 controller (its a 3rd party one in transparent pink) for Nintendo 64 emulation and it works great.
And you can find used 360 controllers fairly easy.
