Hi. I downloaded a ready-made server created by zunnie, and I want to try to configure it. This server was adapted for gamespy, and I don't have any knowledge or experience, so I'm asking for help. There are a few ini files that need to be rewritten.
I don't think it will take too much time.
Download CoopBeta300.zip from list, you can send the files here or write how to run it
downloads.cncfps.com/Renegade/FDS/

To do a non gamespy server you'll need an xwis account and password first.

Find last ver 4.2.4 <https://multiplayerforums.com/files/file/9-coopbeta/> Does someone know if it's configured or if I need to edit the ini files?
