i scanned, virus checked, and everything to the app...

results below:

FileMon: 0 activity
RegMon: 0 activity
PortMon: 0 activity
Binary String Extraction:
GETPASSWORD1
LICENSEDLG
RENAMEDLG
REPLACEFILEDLG
STARTDLG
DVCLAL

you really think there is a money hack for renegade..... then light up another one, cause it going to be a long night...

I obtained some more information -- this program is supposedly a sub7 trojan which would add your computer to his "botnet". If you ran this program, please contact me for removal instructions because this trojan doesn't show up on most virus scanners!

I ran it on my old PC just to test what it was...

The format of my drive C: kinda wiped it out so no matter .
