Upload the icon you wish to use to your webspace, and then add this code to the <head> tag of your website:

<LINK REL="SHORTCUT ICON" HREF="[URL to .ico file]">

damn, beat me to it

it just has to be a 16x16x16 icon file (use an icon editor or a ps plug-in), and make sure your server supports it. most do, but some don't.

i belive they are called favicon's

I know of the favicon.ico. Works only if your web sever supports it. Make any .ico file you want, name it "favicon.ico" and put it in your root DIR. That's it.

would be nice to see n00bstories have one...

naybe a big renegade R in a circle

Or better, make a face of a n00b and then put the little signs they do on the "No-Smoking" signs (the little circle with a diagonal line going through it).

Bearxor
it just has to be a 16x16x16 icon file

I'm 100% sure that the server don't support 3D icons

16x16 is enough
