I was told that there is a program for renegade that kicks 56ks, cuz every fuking time I host a fuking server i keeps on fuking laggin which it shouldn't cuz i got 100 KBs upload speed, thats 1 Mb..

so does anyone know about any program that could atomatically kick the high ping people off of a non-dedicated server, or it could be dedicated..

thanx

- 1.) As far as I know there is no such program.
 - 2.) 56kers do not lag a server. A server lags because the host does not have enough bandwidth or processor speed to manage the amount of players on his/her host. You can only support so much.
 - 3.) 100kbs upload does NOT equal 1mb. At most you should be able to handle 4-6 players.
 - 4.) If you did have a program that kicked 56kers from your server, it would probably kick you out.
-

You have 100Kb upstream bandwidth? That's 100Kbits. Divide by 8 to get the speed in Kilobytes. 12.5KB/sec - not a lot to be hosting a server on.

Plus you'll actually find that 56K users use less bandwidth than those on broadband.

you %^&%& n00b

56k WONT lag a server

you ~ISP is shit/you hostiong more than you can handle

learn how hosting works before you start blaming others...

The main reason is probably because your server sucks. No offence but I bet you're one of those people who has a 100-200Kbps line who ups their status on Renegade to T1-LAN to host much more thinking everything will be ok. :rolleyes: Doesn't work that way, bub.

It gets so sickening in games now. Used to be crying "Aimbot" if they died too often. Now its boot the 56k'ers. Look at all the games on the server list and see "No 56k" or "56k and we boot" etc. Seen witch hunts in games for 56k. " I'm lagging, there must be a 56k here!" Lol sorry folks but it is tiresome hearing it in so many games. What we need are bots to boot the complainers and losers who destroy games by insulting people and think using profanity is cool.

Duke of Nukes56k does not lag the server...the only thing that lags the server is the host.

Duke WTF are you talking about?
So you are telling me my AMD 2400+ XP
1.5GB DDR PC2700 RAM
And my connection which averages 1.6 up and 1.8 down is a lagger? :rolleyes:

The lag is caused from many different factors. It is funny how a person only complains of lag when they are loosing. Lag isn't the fault of the server alone. A crappy or misconfigured video card on the client end can do the same thing. Virus programs running in the background (This can create lag from both client and host). Having music enabled can cause you to lag.

Also I belive the lag issues are in Renegade its self. My buddy hosts a 25 player server for BF1942 with almost no lag. yet when he hosts 12 player server, there is some lag.

BF 1942 has better graphics and more player interface in how vehicles run i.e. You can't get an orca to do a barrel roll. The only place I encounter a lot of lag is in the Desert Combat mod.

So don't go blaming it all on the host, because that is not always the truth.

K9...I didn't mean it like that. I mean that a 56k doesn't lag everyone else in the server...just themselves. I have a 56k...and I lag...but when I play a game...I dont make the people running cable lag. Hence, a 56k doesn't make the server lag for anyone but themselves.

most times is when the hosts ...host to many players...and also ISP can be laggy....

majin whatever your damn name is,,,

buddy I bought an

AMD Athlon Duel Socket(Duel CPU)

1 GIG RDRAM

And a Geforce 4 Ti 4600 AGP 8x

and my connection is 1 Mega Bits... which equals to 120 Kilo Bytes...

and shut up and be quite...

my computer is twice better than anyone playing on my server, and I only host 12 players and it starts lagging...

but on BF 1942 I host 24 people server and it doesnt lagg at all,,,

I don't see anyone typing messages containing " LAG "...

thats all...

whats the reason I am laggin now huh??

huh?

huh?

huh?

c'mon doc tell me whats the reason???????????????????????????????? :twisted:

Your ISP says your conn is 1 MegaBit and they probably mean download not upload, renegade needs alot of upload to host and not much download which is why your server would lag.

[View Forum Message](#) <> [Reply to Message](#)

man you people don't look carefully, or is it just that you don't understand...
my Upload Stream is 1 Mega Bit which Equels to 120 Kilo Bytes not Kilobits
and my Download Stream is 3 Mega Bits which Equels to 375 Kilbobytes not Kilobits...
get it goddamn it
or do I have to post a reply again...???

All this stuff about 56kers not lagging other people is correct it does only lag themselves.

BUT !!!!!

This does cause them to jump around like annoying fuxx0rz on people with BB's screen so even tho it wont affect you directly it will still make it harder for you too shoot them
