seems EA deleted them from the FTP or I can't find them, and my DI manage server is down, so I uploaded it here:

Oh that... I believe that terrain comes with the Renegade Public tools, it should be in the buildings folder of the help folder.

I'm not quite sure what you're after, but I think you just have to take the template, and modify the terrain yourself, not that hard.

It's in the Renegade Public Tools... :rolleyes:

RenegadePublicTools->HowTo->Multiplayer Maps->Map Template->buildings-setup.gmax

Oh, i thought you wanted the bumpy terrain, as shown in the pic you linked us to. It's on the ftp, flying tamplate too. Just get the buildings.zip. It's in there.
