I was browsing on a site and found this neat skin that turns under into a sand map

<http://www.n00bstories.com/image.view.php?id=1391016836>

I saw a link for another texture change but it wouldnt work. Could someone please tell me where I can get some of these textures?

It was made by <http://www.planetshaun.co.uk> dunno if the site is still around. Basically it's just a few textures renamed. A desert texture called L02_snow.dds will override the snow texture, thats how it works.
