When i go into the WOL screen, at the top, it says my conection is a 56K...but it's not even close to that, because i log on using my univ's reznnet. Does anyone know if that affects my ping or like...i dunno...anything?

Thanks

Some where in Renegade there is a thing that you click and it scans your connection and correct the 56k thing, but i don't think it maters what it thinks your connection is does it?

When it says "Testing Bandwidth" Do not cancel, or else it will give you all the crappy servers cause it thinks your 56k

Open WOL (dont you dare touch that gayspy button) and move your mouse to the left edge of the screen. A menu will pop out. Click "Manage my account" look for "connection" and set it to "LPB Hoar"

By the way, that auto thing doesnt work, because it says my 56k modem is a 4Mbit connection. I wish it was.
