You'd be better off going to some other game engine.

mike9292L3f7H4nd3dYou'd be better off going to some other game engine. y would u think so

Because the Renegade engine is weak and extremely limited.

Better off with a real game engine like Quake 3 (used in MOHAA, that silly Jedi Knights game, RTCW, and others) and the like that actually give the user the partial source code.

Ren's engine is perfectly fine, you guys just dunno how to work it!!!

jk

Seriously though, you can do a heck of a lot of things with the Ren engine. You might need a custom scripts.dll but if you're going to be modding something like Q3 you'd have C++ anyway right?

I will prove to you guys that you can do plenty of amazing things.

Why do you say everything in caps?

The number '13' and a word that starts with an N, has two 0's in it, and ends with a B comes to mind.

The Renagde site Part of my Network sort of speack is up and we are adding content. Thanks to Sk8rrimuk for making the site layout .

www.strategy-x.com/~neox/ will be changing to <http://neox.strategy-X.com>
