
Subject: An idea to give tribute to the Armed Forces

Well, browsing through the news today, I suddenly got an idea in my mind, how 'bout we all make a map, and dedicate it to those lost in the recent war with Iraq? My Idea (and im not sayin this is the best idea) is to have an Aircraft carrier DM map, with orcas, apaches, and chinooks on the flight deck that you can use, maybe a few small patrol boats nearby connected by a rope bridge, and there would be Nod and GDI "bases" (areas far apart, like GDI's could be on the tower, and Nod's could be in the engine room) with a beacon pedestal so the game would be sort of like CnC Mode. There would be several inspirational messages for each branch of the armed forces in their respective areas of the carrier (Marines/Army down belowdecks, Navy on the bridge and Air Force on the flight deck) and also in each place would be the names of all of the soldiers who died. If anyone would like to help, with Ideas, mapping, etc. please post here, as I think this is a noble thing to do for anyone who plays Renegade and is connected to the war.

Thank you for your time
