Where can I find some good tutorials for 3DS Max? They didn't come on my CD. And dont give me this:

"www.google.com This site does wonders."

I posted this topic in other forums and I keep getting the exact same response.

They didn't come on your CD? What, did Discreet forget to put them on your version?

If you didn't buy it, at least have the balls to admit it.

Who the hell cares, really? There is no need to spread this spam over 2 forums and almost a half a dozen threads. If noone wants to help you in 1 thread, what makes you think they'll help you if you post about it in 4-5 threads?

And fix your CAPS LOCK key. No one likes a person yelling for no reason.
