How do you make PT icons? I have made a A10 flyable and I noticed it doesn't have a PT icon (not an official one anyway). I was just wondering how you get that yellow glow affect around the object in the PT icon. I'm newb at photo editing so I don't know where to start. I wish to create my own PT icons and then make then look as good as possible and near as to the official ones.

Thanks

Here are the blank PT Icons, all you would have to do is take a screenie of the tank/plane/soldier and then cut around it and then paste it onto the correct Icon.

Give Taximes some credit if your going to use those blank ones to create your own.

Or you could just use the ones he/I/WW made. Click the 171 PT Icon Pack (for all you modders) link in my sig to get them just follow the instruction in the read me and the thread for all the info you need on getting them to work.
