Hehe, i was playing around with the character studio feature that lay redundant in 3DS Max (lol, i found my user manual) and i made a quick silly 2 minute model using the Bipe feature.

I then just fiddled around with animation and came up with this!!

<http://modx.renevo.com/showthread.php?s=&threadid=341>

Don't worry its tiny in filesize, about 256KB i think!

Tell me what ya think!
