I downloaded the hidden veichles path from the mod download site and i have no idea where to put it to use it. Could someone tell me.

Thanks

Blue

hidden vehicles path??

where did you get it, what does it do? WTF?

All you need to do is open the console in the game by pressing F8 (i think) and write "extras", without the "", the go to a PT and press Alt when going to the infantry or vehicles menu
