Okay, it's time to release the application i've been working on for the past month or so.

Renegade Buddy List

See screenshots here.

<http://www.thecodesmith.com/download/buddylist/frmAdd.gif>
<http://www.thecodesmith.com/download/buddylist/frmMain.gif>
<http://www.thecodesmith.com/download/buddylist/frmMain2.gif>
<http://www.thecodesmith.com/download/buddylist/frmSynchronize.gif>

Learn more and download at this URL.

<http://www.thecodesmith.com/download/buddylist>

Locate Your Buddies - You're able to keep track of your online buddies and find exactly where they are within Westwood Online. You can page and find your buddies directly from your Windows desktop - without even opening Renegade!

Add Many More Buddies - There's practically no restriction as to how many buddy names you can add. You can greatly exceed the existing Westwood Online restriction of twenty entries per login. In actual fact, you will be able to have as many as 32,767 entries if you somehow find the need to!

Find Buddies Faster - From recent testing, the application is already much faster than the buddy list you've been used to within the existing Renegade interface. One reason being that there's no need to fetch any clan/score/rank information.

* Synchronize With Your Renegade Buddy List - One really useful feature is to download your current buddy list from the Westwood Online servers, you just choose which of your existing buddies you'd like to add, then add them!

* Page Your Buddies - One of the best features, is that you can page multiple users that are logged into Westwood Online. Whether you choose to page a player or server - each conversation will be displayed in it's own individual window, allowing you to continue to chat with multiple people at the time, with ease.

Miscellaneous

- ~ The option to refresh the buddy list automatically, at one minute intervals.
- ~ Locate buddies from each of the Westwood servers (USA, Pacific, European).
- ~ Open a web browser to display Player Statistics and a Game Summary, by right clicking the list.
- ~ Choose to login with a regular-player nickname, or alternatively use the details of your FDS (free dedicated server) to synchronize your buddy list, send and receive pages.
- ~ Flood control has also been included as a security precaution, restricting you to send one page,

per 5 seconds - this is to prevent intentional and unintentional page flooding.

* To use these features, you must enter your Westwood Online ID, password and serial number.

Command Line Arguments

There are two possible commands you're able to send to the program.

To use this feature with any shortcut, the target should look like this:

```
"C:\Program Files\Renegade BuddyList\RenBuddyList.exe" /r /c
```

Special thanks to the beta testers (aurorax0, beanyhead, DOM_Snipesimo and Dante).

Hope this helps everyone,
Enjoy!

It's about time someone made a program to do this, I've been getting really tired of logging onto WOL to see if anyone worth playing with is on. Thanks!

MeXadiazNice, when I looked at your sig, ! How did you make the orca mountain or have the balance to stack those transports...

Probably a gmax + editor trick. He probably made some kind of invisible box for each orca

Probably a gmax + editor trick. He probably made some kind of invisible box for each orca
Nope, each of them were manually flown and landed - one by one...

Eventually it began to mount up, which took around 2 hours to do, you'll see some better pictures here: <http://www.spliff.wideboys.co.uk/renegade>

Wewt. I was beginning to wonder when you were going to release this program; I was starting to regret not asking to be a beta tester. Very nice app here - lots of great features, including being able to save conversations. Keep up the awesome work!

[View Forum Message](#) <> [Reply to Message](#)

Was released nearly three weeks ago (Tue May 20, 2003 2:10 am).

Click the 'About' button if you see one in the program, and if you're using version 1.05, you have the latest release.
