Alright so im playing the other day and this guy on NOD was all the way on top of the mountains(near the GDI boxes that are located near their barracks) I asked him how he did it but he only replied by saying you need someone else and to do it from the NOD sniping spot. So today me and my buddy got to a bunch of different cool locations that are good for sniping.....but we just couldn't get all the way up there! Anyone have a clue on how to?!Thanks Bye.

Yes, but it's an exploit, and I hope you get banned if you use it.

It's fairly easy to do. Basically you just jump into another person like when you walljump and eventually you will get up onto a higher surface. Not much use though as it suffers from major VIS glitches as the VIS is not rendered from that point of view because the map designers didn't intend you to be able to get up there.

Check the Strategies and Tactics forum, it was discussed how to do it in there.

Ding!

However, that isn't the spot they're talking about...

Still, those are some of the VIS glitches you're going to encounter...

Still, those are some of the VIS glitches you're going to encounter...I saw that final pic in that other post. I tried getting there by jumping left but just kept falling into the tib! Any help on that one? It seems legit.

\_General HavocYah. For some reason a lot of peeps dont use that. I mean it does seem like an exploit. But, I think since it involves teamwork (and can also be over come by teamwork) that it is legit. Unlike some (like the one I was talking about in my first post).....oh btw I did that first thing I talked about in my post and I jumped onto that outter fence..... its kind of funny watching people run by you not even suspecting your there. I got off it though because I believe its an exploit to the game

Someone should start a big post about all these sniper spots with screenies of them so we can all see them and help people if they ended to know.

And ACK was that really necessary? Where you put "Its still an exploit and I hope you are banned for it."?

And ACK was that really necessary? Where you put "Its still an exploit and I hope you are banned for it."?Is half the stuff he says necessary? But thats the great thing about America. Freedom of speech. But, I don't see how its an exploit when its modeled.....and it requires teamwork to arm it and then teamwork to disarm it.

ok here you go DBB, i got your photo evidence myself, though i don't think he went the same way i did on the GDI side. I think he jump on another person from the GDI bunker onto the area i'm standing in screenshot 16 or did a jump onto the GDI bunker walked on fence to those sand hills.

Any other questions?

My clan site is down right now, but it should be up sooner or later
