Correction; you give shit to this community... If you would work to make your models half-way decent, then come back and claim to be high and mighty, you'd be better off.

Then again, you don't do that... I don't care if you try or not. Try on your own. Produce results, or don't fucking post anything. I'm sick of garbage modifications being posted by little kids with no initiative.

You already had like five modifications going before this. You never finished a *single one of them.*

Finish what you start or get the fuck out.

Your right i am a little kid. But not a a little kid that wants to outdo any1. am here to have fun, play some games, make models form my own designs by trying to keep the models poly within the limit.

I am not a adult (in my country over 18 is adult) acting like a child, i am a child, you can not change the way i act or model with your words. And i have gone thourgh my life with people like you who like nothing but theirselves. I m sick and tired of your peoples attitude.

I have to agree with Psycoarmy on this one, why should it bother you ack if he makes crap models?

If there so crap why do you even need to comment on this, is it because you feel the need to slate

everyone to stop them becoming as good as you at mapping/modelling. You we be far far more respected if you learned to help people and stop insulting them. If you want to get a job in a company modelling and mapping which i am pretty sure if your target in life.. no one is going to take you on cause you act like such a jerk you now have a reputation for ripping into anyones creativity and that is going to stay with you for a long time unless you change your name and break every tie with this community.

I am not saying this as a friend or as a enemy i am stateing this as a fellow member of a community which you are destroying with your negative influence to every shread of creativity. I am sure this post wont change you, i am sure you will go through life being so narrow minded that you continue to put other people down for being creative. I no longer want to witness the endless shit that goes on in this forum i would recomend everyone who wants a decent community where people wont flame you but will try to help you out if you are having problems to go to Planetside i see 100th of the flaming over there thaN i do here and that community is 10 times the size of this one.

Soon enough when ACK has scared everyone away from the renegade community besides the people that dont visit the forums and therefore dont play his maps he wont have anyone to flame besides crimson, Blazer and maybe Dante who i think are hero's for sustaining this community for this ammount of time. Over the past few months i have seen many friends leave this community i am afraid i am very close to the desision too, and no ack i dont give a shit if you think i have done nothing for the community and i wont be missed because if this continues there will be no one left to play your maps THEN YOU WILL GIVE A SHIT.

- Snipefrag

PS: ACK you may not even realise it but you are destroying the community that you love for you own means..... Fame..... and being hated.

And all the people i have promised to make maps for dont worry i will be true to my word after i have finished my A level Exams (a few weeks).

Oh fucking please, stop assuming. I've laid out my point of view on the table, and all you can come up with is "But it's all your fault! You did <this and that> and you just want to be famous (How the FUCK can you be famous in a game that's nearly ignored by the gaming community as a whole? Idiots.) you big meanie head!"

I've told you what's wrong. You're the reason this community is dying. Instead of actually modifying the game, you put out shitty models, expect people to kiss your ass, and do nothing else but that... Then when people ask "Where's da goods, brotha?!" You tell them "Stop being mean to me! You're destroying this community! Waaah!"

If you can't take the truth, then get the hell out... This community needs people who will actually

be dedicated, instead of people who expect to be treated like a king while doing nothing. Respect is earned, not given out because of some shitty models and modifications you're never going to finish.

I hope *both* of you leave this community. None of you have done anything to help it at all, yet you bitch and moan... Get the fuck out and don't come back.

I think ack just has some personal issues in his life that he should deal with first. I am pretty annoyed with his bullshit lately. I did not hear PsychoArmy ever say he was higher up than you, and he was king. I think you need to be put away to a nice little room with some comfy little padded walls ack. I love creativity, you moron... If I didn't, I wouldn't be working with Renegade Alert. I wasn't a part of their team for about two months until I joined it, so don't go saying I was always a team member... I didn't ask to join until I saw the quality of work being produced.

You don't even know anything about me, just what I show to the public here. You judge me from a gaming modification forum and think you're a psychologist with an eight year degree...

What does it matter? It gets peoples' hopes up, it makes them think something will come out, then you sad little motherfuckers destroy that hope by slacking off and whoring for attention. The need to flame you people is already evident: You're fucking *idiots* and you refuse to do anything to help this community. I see you accusing me of wanting "fame" in a game no one knows about anymore... But then again, aren't you the ones putting up all these little images, then whining when someone flames you? If you didn't want fame, you'd say nothing at all and accept what's written. You're the pot calling the kettle black, all of you... A bunch of fucking ignorant people who only want what's best for themselves and nothing else.

Dedicated? You're damn right I am... I've spent over a year of my life making this game what it is today. I helped beta test it with Crimson, Urrtoast, SencneS, Falconx10, and the rest of the beta testers. I spent a year making maps (Yes, I've been around since 3 December of 2002. You have not.)

I don't want any respect from you. I don't like you. I have never liked you, nor your attention-whore "brother" called Halo38.

This is all that needs to be said, besides the above.

KIRBY098 You know what? I know Dante has his hands in a lot of stuff. I also know that he has contributed A LOT of things.

But the rest of you modders who start, promise, and then never complete anything need to lay off the "Be nice to me, or you won't get your mod." B.S..

I have yet to see any credible mod in mass use, except ACK's maps and blazeregulator. By anyone.

You are a modder by choice, and have the time to dedicate to these endeavours. I cannot, and will not make the time to do this. I am a father and choose to devote my time to my kids, not Modding.

If you as a modder make a promise to release something, you need to fulfill the promise, or lose credibility. So far the only credible teams out there are the ones who developed REOL, and RedAlert total conversion.

Everything else is half finished, never released, joke.

While the rest of you are patting yourselves on the back for mods Dante is writing FOR you, the rest of us have given up waiting for anything to come from this pathetic mod community.

It's no wonder Dante had to create the Mod exchange. No one else was going to do it. Stand on your own, and stop letting him carry this community's only hope for life after Westwood.

Im sorry Psycho to lead to more flame,(i do not think your stuff is garbage and dont really plan to focus my life on what it does look like) But Ack, im sure youve earned the respect of people bored with the default maps and such. But when youve gone this far to blow up on people who think otherwise and are experimenting for themselves, wheres the respect in that. Seems you are discouraging people that could be helping to expand Rens ideas and use them eventually for better enjoyment for the game. I respect your programming and editing skills but the attitude needs adjustment a tad.

ACK read your post again because ur obviously not relising wot u are saying 'I'm sick of garbage modifications being posted by little kids with no initiative', this mod is not garbage, i am recreating

everything, even character types and their skeletons, i am trying to put as much new stuff into this mod as i can. All my effort is going into this. Dont judge a mod by its models/skins, we learnt that the hard way with ren alert(which i think will only get it downloads because ir is one of the only total conversion that might come out besides reborn).

Also this is a public forum i may leave it and not come back to it is i wish, I may have spent my time doing more important things such as a education, job or other things that dont involve sitting on my ass all day starin at a crappy screen.

Also here another point, my skins are shit, would anyone be interested in helping out my mod team by doing skins for me? :rolleyes:

Basing a mod on a already excisting game isnt being that creative, all my models are my own designs, therefor being completly original.

I dont mind you saying my work could use a bit of work, but calling me some f***** up c*** who cant do s*** with his skills and shouldnt come bak to this f***** community until im as good as him does upset me a little (swear words added by me). :rolleyes:

I was gonna add some strange speech about all of us being animals and dont have to be perfect but i cant be f****.

ALL PEOPLE WHO JUST SCROLLED TO THE BOTTOM BECAUSE OF ALL THE SPAM! do not bother reading any of it, but dont be discouraged because i sitll need your thoughts of my models.

Peace Out

Yes your skins are shit... but even if someone made you some kick ass skins, your models are still shit... nothing is going to change that, except if you somehow develop skill. I am no modeller, but those look like crap. They all are too square and the weapons look like something out of Planetside... and some of the vehicle models look like some Generals vehicles (only more square). May be from scratch, but not creative. If the final product is anything like these models, I wouldn't waste my time downloading it.

PsycoArmyAlso here another point, my skins are shit, would anyone be interested in helping out my mod team by doing skins for me?

Don't worry about the naysay. Admitting you own weaknesses is respectable, even if some take that info and try to use it against you. Keep working at it; you can only get better with time.

Nice models, I like the creativity and you have some great ideas. Some of them have bad skins though, you may want to work on that.

I know what a spam post is... It's a post that has nothing to do with the original topic. Just like most of his replies, all my replies, and your reply to mine... I never said I wasn't spamming, I was just pointing out that he was as well.

Halo, I'm not talking about the "post02" incident. I don't even know\remember what you're referring to. All I know is that you're a whore for attention and release minor things, demanding that people credit you for using them... If they ever actually did.

You have a wonderful way of twisting things and you should know by now that doesn't work with me :rolleyes:

I have never demanded anything..... wanna counter that with evidence....didn't think so.
:rolleyes:

When anyone releases some work they would like credit if it is used by someone else.... whats wrong with that :rolleyes:

I'm not sure on your daily routine, but mine doesn't involve sitting in front of a computer all day making stuff for renegade, do you even have a job?? and as you very well know I'm busy with Warpath and so can't spend a lot of time on my other projects hence a teleporter model here a stealth generator there..... but being the smart person you think you are I'm sure you have already worked this out. :rolleyes:

You just contradicted yourself, you know... A request for credit is basically the same as demanding that you get credit. You know you would violently defend yourself if someone took your work and didn't credit you.

I see how you work, though... Address a point, make a new one like "I'm so better than you, " and then go say something even more stupid...

O...k... your tangent aside,

Answer me this.....What is wrong with me uploading a model and asking for some credit if someone wants to use it (you have done the same so have many other modellers), tell me with out going of on one of your tangents. :rolleyes:

Obviously, I was talking about myself, as well. I never said I wasn't included.

Quite the contrary, Halo38, what I wrote was not irrelevant... Not a tangent in the slightest. I suggest you understand the meaning of a word before you attempt to use it.

I never said anything was wrong with it, if you had bothered to read what I wrote... I said that you would do exactly the opposite of what you claimed, e.g. demand credit if someone decided not to give it to you and call the work in question their own.

Wait..... this is what was said first by him

Quote:All I know is that you're a whore for attention and release minor things, demanding that people credit you for using them...

With this he implies there is something wrong with uploading a model and asking credit for it (note: i 'ask' i don't 'demand' demand is a more aggressive word i choose not to use, he asks for credit too and i remember one of his readmes that 'demanded' that he was mentioned near the top of the readme and not near the bottom, that is the difference between asking and demanding, so it is only you who is demanding things.)

Did it ever occur to you that this is exactly what Ack was doing... giving him his honest opinion on his mod. Just because no one else seems to like Ack or what he says, doesn't mean that it wasn't the truth, at least from Ack's eyes. There is an easy rule of thumb you can go by in this community... if Ack doesn't say anything about it, there is a good possibility that others might actually like it too... think about it.

You ask me to answer a question, then you put "ownt" in there (Which is Blazer's term, by the way.) like I was expected to post a reply in your own post? Just wow...

The point I've been making ever since you came here is that you're an attention whore... I'm *oh so sorry* that you can't see the point being illustrated without me having to make sure you understand...
