I know it might be a sily question but after installing from first cd the second cd was not required, what is it for ?
any one,

thanks

One is a game CD, the other is a data CD... both will get you into the game, but without the data CD in, you won't see any of the movies in single player, (or the beginning movie(s) neither, it'll just ask you to put in the Data CD, if you press cancel, it'll kick you to main menu).

Yah, I was getting realy ticked of that all the C&C games I had you could play 2 players on lan, with only one copy of the game, and you couldn't with renegade, but then I found out you could, and I was happy...

THANKS ALL FOR THE INFO
I just found out that I am one of those people that ask questions before trying out things, and this was a greate example of that, LOL
Game starts with both CDs for me, so if you give more details I might give the answer.

thanks again
