Hi.

I have a little problem. It's about typing password in 'renegadeIP' tool.

I want to join server, passworded server (I know password) but I don't know where to type password. Help me.

TIA

I think it goes at the end of the commandline in inverted commas after the username. I am not certain on this but as far as i can remember it went at the end. I can't post it here because it is considered as an exploit when used with WOL. I though the tool put the password in for you anyway?

Yeah. I see, but I didn't mean that, sorry!

I meant HOW to type it. You know. I tried +password "password" and similar combinations but I still can't join server. It just stops on "joining game" screen What form to use?
