I know this has probably come up before but 31 pages is too much to scan through on a 56k modem. I have three questions i would like answering please.

- 1) How can or where can i get maps that allow air vehicles to be piloted?
- 2) How can or where can I get maps that allow this AND for bots to be on?
- 3) Where can I get these from for a LAN game i'm trying to run, as I can't find them here?

Thanks for your help.

you can get flying maps form renmaps.com, just be sure to check if flying vehicles are included.

Maps with bots and flying vehicles are rare, the only one I know is Lunar Landing

As I said before, check <http://www.renmaps.com> or <http://www.planetcnc.com/ammo>

Go to <http://www.google.com> and type in Renegade Mods. Any map that has "flying" in the name indicates flying.
