Try deleting all the .pkg's in your data folder. It may help.

nope, doesn't work, does exactley the same thing as when i click on advanced game listings.

First come up the Testing Bandwidth
Then it goes to Requesting Server List and does nothing, and then says failed to connect to WOL.

ITS DRIVING ME NUTS!

Thanks Anyway Though.

Delete your HOSTS file? Search for the file, it's simply called HOSTS, no extension.

That was always why I couldn't connect to WOL back in RA2, so *shruggs*

Glad to help.
