I go to an internet cafe to play Renegade with a good speed and they format thier pc's every 3 weeks. They copy installed game images onto all pc's. All thier games support cd-key changers exept for Renegade. We can only run 2 players on the internet and desperately need to be able to easily change thier cd-keys. They do own numerous copies of renegade but are to lazy to install different cds on all thier comps. if anyone can help me here please send info to my email: synboard@hotmail.com and make my friends and I very happy

Majiin Vegetaerrm....don you just need to chanmge the CD key in one of the files?

I think so, i came across a file in the ren dir it it seemed like the CD key, but it was encrypted, so you need so somehow find out a way to crack the code and de-crypt it and encrypt the new key

I'm no good at programming or anything. I really need some sort of program ready made to decrypt it for me(if that is the right file). They have a program for battlefield 1942 that you can enter cd-keys into the file and when you need to change them you just double click the key you want and it enters that key into battlefield.
