.....

And for gods sakes its a WAREZ site!

First off, n00bstories is antiwarez as far as I am concerned (judging form the topic name in #n00bstories on irc at the release of Generals), Not all of us agree with this (as far as being antiwarez ourselves) but we dont take our warez here. You did, From what I know its one of those rules that you should just know already.

And from IRC..

ignore all the crap this guy says i honestly dont know what his obsession is with me :rolleyes:

You say you think your site is the best site for ROMS out there? Then why dont you have a domane name atleast...or a better background that doesnt lag....or look like shit....

This reminds me of when I had a website...about 5 actually...on a server I actually paid for...with money...like what you get if you have a life...

I wanted it to be a place for everyone to enjoy, no matter what you like. It had games for all age

groups, music, jokes, game cheats (never got finished though). It was a pretty good site for a rookie site creator-considering I did everything myself and had no way to advertise other than in real life...but this was in elementary school mind you, so all the kids are like "wuts dat? a website? whuuut?"

But then, one day as I was sitting in a nice green leather recliner that came directly from Ireland, using money that people with real lives have, I realized something. No one came to my site, I got about 3-5 hits a day if I was lucky, and I had it in search engines, forums, chatrooms, all over the place.

I figured it out, my site sucked, nothing I could do about it, I just wasn't good at it.

Now this isn't all about website building here, but the main point of it. The main point is finding that something you're doing is, well, just not your thing.

And this, my mentally challenged friend, for you, happens to be life. You're not good at life, you're not good at thinking, socially communicating, anything to do with artistic fashion, anything to do with other people, anything to do with anything.

Quit while you're at life, you're no good.

Quote: I finally got my own LEGAL ROMS SITE

Guess what? THERE IS NO SUCH THING AS A LEGAL ROM SITE! Roms are illegal reproductions of console games. While I'm sure the law can overlook owning a rom -if you own the actual game. However, distributing them is illegal, and no amount of disclaimers will save you. (If they did, imagine how many drug and crime lords would use them) Why are they illegal? Because the companies that make them lose money. Only if a company actually releases a statement allowing the production of them, they will continue to be illegal even after the product is no longer made. (I have yet to see such a statement released.)

Quote:If you are affiliated with any government, anti-piracy group or any other related group, or were formally a worker of one you CANNOT enter this web site, cannot access any of its files and you cannot view any of the HTML files. If you enter this site you are not agreeing to these terms and you are violating code 431.322.12 of the Internet Privacy Act signed by Bill Clinton in 1995 and that means that you CANNOT threaten our ISP(s) or any person(s) or company storing these files, and cannot prosecute any person(s) affiliated with this page which includes family, friends or individuals who run or enter this web site.

Quote:just to make one thing clear a noob is someone who is new to a game didnt you guys know that?

Just to make one thing clear. A NEWB is someone who is new to the game, a noob, or n00b is someone who a player who may or may not be new to Renegade, but insists on doing brainless things, especially things that hinder the team. Such examples are using the "cool blue gun" to "shoot" an enemy or his vehicle, or placing proximity C4 in the middle of the field. Those who are defined by this site as "n00bs" will also refuse to listen to words of wisdom or, even worse, berate those who try to help. (taken from n00bstories.com)

Or in your case someone who, with overwhelming evidence of ignorance and idiocy continues to do the same thing, despite being told when to stop, or that what they are doing is wrong. (ok, not an exact definition, but I think it's close enough. If someone has a better one, feel free to improve upon or correct mine)

No-IP.com has rules against using their services for illegal services. Warez can be considered illegal. I don't know much about "ROM" sites, but I bet if no-ip found you were using their services for shady stuff, your account would be deleted and your IP banned.

I must make an apology to sjezk3. I did some further research into the legality of roms and I discovered something. Since roms fall under the title of 'software' distributing roms can be legal.

However there is a catch.

Quote:by the reproduction or distribution, including by electronic means, during any 180-day period, of 1 or more copies or phonorecords of 1 or more copyrighted works, which have a total retail value of more than \$ 1,000 shall be punished as provided under section 2319 of title 18, United States Code.

To explain it, you can distribute Roms, but only so much. Considering the retail value is, we'll say about \$50 US just for simplicity. You cannot distribute more than 20 roms every 180 days. So, if

you limit the number of downloads to 20 every 180 days, I won't have a problem with you keeping your site up.

And yes it's easy to check if this limit has been implemented.

Just to let you know the legal course if the law is broken...

Quote:"(1) shall be imprisoned not more than 3 years, or fined in the amount set forth in this title, or both, if the offense consists of the reproduction or distribution of 10 or more copies or phonorecords of 1 or more copyrighted works, which have a total retail value of \$ 2,500 or more;

"(2) shall be imprisoned not more than 6 years, or fined in the amount set forth in this title, or both, if the offense is a second or subsequent offense under paragraph (1); and

"(3) shall be imprisoned not more than 1 year, or fined in the amount set forth in this title, or both, if the offense consists of the reproduction or distribution of 1 or more copies or phonorecords of 1 or more copyrighted works, which have a total retail value of more than \$ 1,000.

by the way, thats not 20 of each rom, thats 20 roms in total.

EDIT: just put in this last line.

ROMS ARE NOT WAREZ !!!!

Illigal games (ISOs etc) games that you can still buy in shops are illigal to distrobute with no exceptions they are classed are warez. roms are games that you cant buy in shops no more cos they no longer make games for old consoles such as nes. so roms are allowed to be downloaded off sites as long as the people who have downloaded the rom own the game and delete it within 24 hours as my site clearly explains if you dont delete the rom within 24 hours its your own risk as any rom/emulation site will tell you.

Subject: Carbons world

Actually ROM stands for Read Only Memory, and apply to all games that use this format, not just ones that are no longer available in stores. And roms ARE warez. And like I said before, the only reason your site can exist for the time being is if you don't exceed the equivillancy of \$1000 US in downloads, otherwise it becomes illegal.

Warez:denote cracked version of commercial software, that is versions from which copy-protection has been stripped.

EDIT: And emulators are not illegal, as shown in SONY v. CONNECTIX

Your a shithead. Honostly.

Yes its illegal, because ROMS are only legal if you yourself have a legally owned copy of what your hosting a ROM for. Same goes for Emulators.

And how is it not warez? Warez in my opinian, is any distribution of Applications, Games, Cracks, Serials, for free without owning it yourself, thus, your site gives out games.
