U know what- after reading old topics from these forums, i can honestly say im reluctant to post any more topics. This is because, for example, reading about Tiberian Evolution Titan models, and someone innocently suggesting ACK create maps for the mod pack, and his quote

1. Dont want to etc etc

I havent been on these forums all that long, and i may seem like a complainin little shit, but there aint much point in bein sarcastic like that (not just gettin at the 1 person, i have seen others but this 1 stuck out). If these forums are for helping people, the thats what shud be happening. Theres just 1 or 2 that think theyre god.
