After a while, I got back into the swing of things after playing RA a little too much I was suprised by how many people are on the servers. I guess this game will be around for quite a while.

Did it ever die?? NO RESPECT!
Nah, Renegade never really died, its a way to fun game for that.
If i could i would play renegade every day but i can't cuz my own comp is crashed, trashed, bumped, infected, overload and a lot more...
Modern age... :rolleyes:

why did anyone ever said that it did die, why did westwood never release a expansion, EVERYONE i know who plays c and c games bought a copy of renegade, do you think that there may be expansions in the furutre or a renegade 2, or just a new patch, i liked flying vechicles, it would be cool if they added a new big feature, the only thing that was bad with the game and why it got a bad review was the 1 player level, as for multi player i think it is the best game ever! but why doesnt westwood make a expansion with really cool 1 player levels that will get everyone in to it

(very tired, been working with out sleep for hours!!! so i am ranting on a bit!!)

I get around 70-75 FPS .

But I know where you're coming from. I used to play the game on a laptop which gave me about 5-10 FPS, it was hella hard but I was still MVP most of the time.

Yep looks like your computer is a real POS! I get 30 in most games and I have a Geforce 3 Ti 500! LOL.

Yeah I can't wait for SomeRhino's Sole Survivor and the other mods are still going strong. I still play Renegade occasionaly but no where as much as before. However you'll still see that I am helping people in the mod forum a lot and I come here every day (unless I'm away).

Also I have Renegade to thank for meeting everyone here and which led to me getting involved in Planetside. Although it's not Renegade, the people I see on Planetside and also in my outfit I wouldn't have met if it wasn't for Ren.

How do I order mods like that?

You don't order . They are free to download like Ren Alert and Reborn and Vengeance and Warpath

Err. I'm not "ordering" the mod. My Renegade CD is scratched, so he's burning the install files onto another CD, and sending it to me in the mail. So when his CD DOES get to me, I can get back to work on the mod for him. I already set up a training mission, and now he wants me to make skirmish missions for each game mode (kind of like multiplayer practice). So the mod will have some bot maps. Sorry dude, you're going to have to wait to DOWNLOAD the mod. Right now in .rar form it's about 25MB. You guys are just going to have to wait a bit longer for Sole Survivor.

renegade never died because of the defence and destroy bases objective. its the only game of its kind u fully utilize this aspect. but i stop playing due to iv found it boring nowadays. there is new fps to use and better types of games. i play generals now! counter strike! Brute Force! Runescape! and Freelancer! hope renegade never dies like ra2. bye
