I need some people to moderate my server. It runs on WOL on USA server, usally at night or in the afternoon. It is called Yano7.com Texas Server, info about the server can be found at Yano7.com.

If you don't know what an IP is, I don't want you to be a mod on my server. So go away.

I know what an IP is. I feel uncomfortable giving it away though. Thanks for nothing if that was all it took for you to accept/reject me. I'll go back to monitoring my own server then, thank you very much.
