A test to compare fellow snipers against me, can only be The ADM Test.

<http://www.btinternet.com/~ganners/THEADMTEST.zip>

It's 8mb, stupid un-compressed pictures. You need the VB6 runtime files or you need WinXP.
Enjoy!

Feedback please,

Updated: Fixed some minor bugs.

What should I do in the next version?

and i saw a fight over this, and i have to side against ADM, its all opinion and style, no style is the best, it is how you use it, and one of the dumbest questions i saw is what do you think while the game is loading, that doesnt have anything to do with what will happen in the match, so who cares, rename it to "How much are you like me"

Please from now on use ADM TEST II. It's alot better.

Snipesimo I asked that question about what happens before 1v1 sniper game because any good sniper would be nervous, even though many don't admit it. It's what makes's us human and people who deny this are lying to themselves - in term hindering their sniping skills.

This whole thing was to compare against me, no where does it say that you can use this test to be the best. It's just a bit of fun, some take it more seriously then others.
