Where can I find some screen shots of the better part of the C&C universe and their units ? I know Renegade isn't very historically accurate but I want to know how off base it is...

Thanks

I know someone out there has links or pics of this stuff !!

When I first started playing Rene I didnt really care or pay attention to it but now I'm thinking about it. I know lots of folks got mods in the works and I'm sure one of these helps return Rene to a more historicly accurate position. Why for example does Nod had the stealth tank & GDI has the mammoth tank ?!?!?! This is retarded IMO. I've only really extensively played RA2 & Yuri's revenge. But just from those two Rene is way off base. In RA2 the Allies have all the high tech stuff and the Solviet forces have all the heavy hitting equipment...not the other way around !!! Anyways any info on how accurate Rene is or links to sites that cover the older CNC games would be appreciated.

Your obvious intention was to inflict some sort of discomfort on my life, I can assure you this has not ocured. It's amazing to think that you imagined such a 'carrot on a stick' would have any effect on me. If you told me you had every image I ever wanted in zip files attached in an email to

me and all I had to do was say 'Im sorry' all you'd hear would be STFU.

"I'm sorry" is all you have to say. I don't even care if it has bad grammar like "ima sriry". You're only hurting yourself.

First I don't have to say anything. I chose to respond for my own entertainment only.

Secondly, I'm not sorry.

Lastly, How do your purpose I'm hurting myself ?

Did I not already make it clear there is nothing you can dangle in front of me to erode my will ?  
Yet you continue to attempt with '..all you have to say'. LOL Sit bo bo sit...good dog. Find another John for these types of games. SOOO let me clear this up so YOU can see whats occuring here.  
You want me you appoligize for something I'm not sorry for so I can get some images from you which are being held as the ransom against me so I'll DEFILE MY WILL TO FOLLOW YOURS ??  
Yea...right.

You are only hurting yourself because you want the pictures of the old units and I can give them to you but rather I do or don't I don't really care. I just want to help you and you refuse to say "I'm sorry".

BTW, you're an optimist aren't you?

You can give me the pictures at a price I refuse to pay, the comprimising of my will for your own. You dont 'just want to help me' you desire to break my will and succumb to your desire of being justified in 'thinking' that I was in the moral wrong for telling you to STFU in another thread. You wouldn't believe or understand the 'price' I'll pay to preserve my will & path in life to be untainted and solely my own. For my will & my mind is all I have therefor these two very precious things will not be comprimised muchless for some pictures.

BTW, I'm an objectivist. See <http://www.aynrand.org/objectivism/essentials.html> for further details.

ps. You don't even realize the 'asking price' for these pictures but you beg the offer none the less.

All I'm asking is for you to say two words! (sigh)... since I'm nice (unlike someone \*points to the0ne\*), if I have the time I'll upload all of the C&C pictures from I think general.mix extracted from mix and put into zip files. If I find the time.

Your right you did ask me to say two words and I've stated several times I will not be saying those words to you for the reason in question and have provided a detailed explanation why. If you want to upload the images great if not no big deal. If nice means eroding my will and replacing it with yours then I will never be nice, I will be a cold heartless meany-head.

Thanks but I'm looking for pics/info about the old Command & Conquer units to see just how off base the current setup in Renegade is...for example did the 'allies'/GDI ever have a tank like the mammoth tank ? I know in RA2 the solviets had the apocolypse(sp?) tank <--scarry in large numbers !

You must just try to find out, what vehicle fits it in realty.  
eg. M1A1 (Mediumtank) or MRLS you can find there with pcis, backgroundinformations and some very intresting links.

I have the manual (in adobe acrobat) that came with the Tiberian Dawn win95 cd which has pictures of the units and their description. I can zip this up and send it to you if this is what you need.

The allies didn't have the mammoth tank, but GDI did.

(I swear I responded to this last night \*puff puff pass\*)

If you could email that zip to the address in my sig that would be great. Let me know if the msg is to big & hopefully we could work out a different way. Thanks a lot.

I wonder why I overlooked this.

It seems like my version of the PDF document is different... the renders are used as background and the build icon is in place where the renders are supposed to be.
