Im having a little probelm installing/downloading the linux FDS becuase the other FDS doesnt work. when i install linux FDS i go through the Winzip wizard just clicking next until i get to where "Click on your favorite zip file and click next" but if i do that then i would download carnage club again. it wont just get to the point of unzip renegade_server_1037b_RH8-0.gz. i tried winzip classic but i dont get it. is renegade_server_1037b_RH8-0.gz the wrong one?
