I tested the death adder aimbot and found to be really un-effective it only hit the target I made 10% of time. You set the color you want it to shoot with I set as white, sooo over all it was a complete waste of time.

Don't mean to be rude, but this is old news. Others have tested it and reported exactly the same thing. However, it's always nice to have another source of proof!

Dude that thing sucks....

Most people had that aimbot (or click bot if you prefer) years ago.

When you do get in to real fast paced actual action and you are aiming for somert like a persons head you accuracy is something like 2%.

2% I mean come on... even most n00bs can get a better accuarcy than that.

whats that meant to be?
why take a screenie of that? is it your best rank or something?

I took that scr shot today after a nice sniper war I did yester day, I came out with about 90 kill and 5 deaths Your rank must suck to think that an rank in the 1000s could be a "best" rank for anyone :rolleyes:
