Carbons V3 Mod

This is the best mod ive done so far much better than the stealth tanks and gun emplacement mod that i made. This new improved and more advanced mod includes vehicles being dropped onto the airstrip by a A10 Bomber. Moddified vehicles include Flying Flame Tank, Fast Mammoth Tank, Transport hovercraft, Drivable harvester and turret, oberlisk helicopter, bots and much more. NOTE: Only the host needs this mod other players on the sever dont this is simply because its a script based mod. You can download it here [Carbons V3 Mod](#)

I would just like to formally notify everyone here that several of the mods in this V3 mod release are stolen, verbatim, from me, off my website (<http://c130hq.cjb.net>). These include apache bot in particular, and several others.

These are copywritten mods that carbon simply downloaded from my website (which I maintain to teach people how to make mods of their own). He removed the part that had my name and copywrite information, and he called it his. Now he hosts these mods on renegademods.com, where he is trying to earn money FOR STOLEN MATERIAL (with ads and such).

This is an outrage!

I made a version 3 of my mod stealth tanks and gun emplacements its pritty old now you might remember it from when i first joined renegademods anyway i made version 3 i wasnt going to make one at first but i came across this guys website (HTMLGODS) which had tutorials on how to use the scripts to make cnc_c130drop mods which my mods are based on so i went thru the tutorial and i learnt a few new things. and from what i learnt from these tutorials like how to make the harvester drivable i put in included in my mod.

now this guy is saying i copyied his mod when all i did was devolope one using hes tutorial isnt that what tutorials are for? lol ive spoke to this guy since and told him that but he is not taking any notice and continues going on saying i stole his mods etc ok 1 or 2 of my mods are similar but so what i learnt from using his tutorial. he asked me if i would give him credit for me using his tutorial which ok isnt much of a problem but then he goes round telling people to spam my email account so why should i give him credit when hes going to be like that.

Mods get copyied all the time most of them are better than the originals themselves like look at the

map called Deth_island isnt that map the same as C&C island but its been improve with a slight ajustment that stops people on GDI doing the MRLS thing, that map is officially copywritten but does anyone care??? lol

If all you did was follow and make a mod after the tutorials, you don't really have to do anything. It would be nice to credit his tutorials, but it's not needed. If he's going to still attack you for supposedly "copying" his mods, after you've told him you'd consider crediting his tutorials or whatever and that you just followed them, than just tell him to fuck off and don't credit him at all.

What's the point in putting up tutorials if you're just going to cry "he's stealing my mods, even though he really isn't, blah blah blah" and attack those who follow your tutorials?

Actually, he does own the copyrights to them. Everyone here owns the copyrights to whatever you make, there is no need to purchase patents or whatever unless you want proof or you want it to be 100% official.

Acutally thats not true. If you write something it is not copyrighted what so ever and anyone is free to change edit delete use and play with it however they see fit.

Copyright has NOTHING to do with patents.

If its not 100% official then its not official at all and means nothing under the eyes of the law, in more or less every country in the world.

U.S. Copyright Office Copyright protection subsists from the time the work is created in fixed form. The copyright in the work of authorship immediately becomes the property of the author who created the work. Only the author or those deriving their rights through the author can rightfully claim copyright.

Also, from the same page. (A little further down.)

U.S. Copyright Office HOW TO SECURE A COPYRIGHT
Copyright Secured Automatically upon Creation

The way in which copyright protection is secured is frequently misunderstood. No publication or registration or other action in the Copyright Office is required to secure copyright. (See following Note.) There are, however, certain definite advantages to registration. See "Copyright Registration."

Copyright is secured automatically when the work is created, and a work is "created" when it is fixed in a copy or phonorecord for the first time. "Copies" are material objects from which a work can be read or visually perceived either directly or with the aid of a machine or device, such as books, manuscripts, sheet music, film, videotape, or microfilm. "Phonorecords" are material objects embodying fixations of sounds (excluding, by statutory definition, motion picture soundtracks), such as cassette tapes, CDs, or LPs. Thus, for example, a song (the "work") can be fixed in sheet music ("copies") or in phonograph disks ("phonorecords"), or both.

If a work is prepared over a period of time, the part of the work that is fixed on a particular date constitutes the created work as of that date.

That is a load of crap to be honest.

How the hell can you prove you wrote it yourself in the first place if its not registered?

Say i Wrote a story and didnt copyright it then someone else copied it then regestered it copyright, I wouldnt have a leg to stand on as there would be no proof that I wrote it first.

Besides that in the US, me and Carbon-kid are in the UK so those laws dont apply.

[http://www.copyrightservice.co.uk/copyright/law\(01\).htm](http://www.copyrightservice.co.uk/copyright/law(01).htm)

UK Copyright Service

When copyright occurs

Copyright arises whenever an individual or company creates a work: A work is subject to copyright if it is regarded as original, and must exhibit a degree of labour, skill or judgement. Interpretation is related to the independent creation rather than the idea behind the creation. For example, copyright will not exist in names, colours or ideas, but will exist in a work composed of these elements. In short, copyright may protect a work that expresses an idea but not the idea behind it.

Uk Copyright Laws appear to be quite similar to American Copyright Laws. A person owns the copyrights to his work when he creates it. But to go to court over copyrights it needs to be registered.

(And, by American Copyright Laws, you can register your work up to 5 years after it was created.)

Just a little note:

UK Copyright Service

Does the nationality of the author matter?

Under the terms of the Berne Convention, authors are protected internationally under the terms of the law in their home country, as well as by any additional rights granted the convention.

(If the work was created in America, or by an American than it is subjected to American Copyright Laws. If the work was created in UK or by someone living in the UK than it is subjected to UK copyright laws.)

Please tell me I did not just read that last paragraph of your lil onslaught on the military. You my friend are a fucking dumbass. Do you realize what the fuck the military does for you every fucking day!? Dont like my language too bad asshole.....because guess what.....the military earned me this right its called freedom of speech. Without the military to earn/defend the Constitution then we have nothing--hell we would all be controlled by Hitlers Nazi party and Japan. Moron. Are you from England or America(I ask because you said "bloody")? Either way our military provides us with these rights day in and day out. Do you plan on serving in the military.....obv. not because your a dumbass fucking donkey raper. When our men and women are over in another country losing their life-making the ultimate sacrafice- to help Iraq gain the freedoms we have and to perserve ours, and you come out and say a dumbass comment like that? Your the kind of people that deserve to get their ass kicked courtesy of the United States Military or The Royal Military. And back to the subject.....Im getting mad at this because A-10's are stationed right around my house(I live in New England so Ill let the smart ones out their figure out where Im talking about) and I have some friends who fly them.....who were/and still are over in the Middle East. So I dont take kindly to having some 10 year old making an A-10 do something its not supposed to do. Learn some respect you fucking whore.

I dont respect the military more than any other organisation. and as for the US military can fuck right off, until they learn to shoot in a str8 line AT THE ENEMY and not themselves or Allies then they can go to hell.

If the leaders of this world did thier job properly then we wouldnt need a military to pursue wars that really dont have anything to do with them.

In my lifetime, I am 18 btw not 10, the millitary, either US or UK or otherwise have not done ANYTHING for me what so ever. Until the people commanding the military learn some respect for us, the public, then they can all go to hell, they dont have, or deserve, any more rights or respect or anything else over any other person on this planet.

As for the A10 for gods sake how many times do I have to say ITS A FUCKING GAME, IT IS NOT REAL, IT REALLY DOESNT MATTER WHAT SPRITES AND TEXTURES DROP OFF A GAME ITEM BECAUSE ITS JUST A GAME.

And FYI no, I dont intend to sign up with the military, simply because I dont want to die for some

useless thing I dont believe in. All the soldiers who go to battle KNOW they might well die, its part of the job and I dont want to kill and/or be killed because some dumb ass guy decided that its the right thing to do. Thats why I dont want to be in the military, why they deserve no more respect than anyone or anything else and why I really dont understand, and to be honest dont really care, why the US cries like a kid who just had his new toy taken from him when a soldier dies.

Hey Thinkharder why dont you just use your S/N and actually "Think Harder" because you are one naive son of a bitch. Yes your mom is a bitch. Because she raised such a jackoff like you. Your dads a fucker. Because he raised such a fucker like you. Your Grandmother is a whore because she had sex with your grandfather.....who produced your Father who fucked your mother and out popped your disrespectful ass. You know, I love little bitches like you. Dont respect anyone. Think they know about the world. Well I bet if you were a "World" leader im sure we would have peace....I mean we would all be hippies wouldn't we? All smoking the chiba and giving it to other men anally right? Yeah right. Face it. You should burn in hell with all those other hippies who say the military haven't provided or done anything with them. See that shirt your wearing? Guess why your wearing it? See that bike your riding? Guess why? See that little dick inside your Mickey Mouse Diaper your wearing.....guess why you got it? Because our men and women fought for our freedom.....there for allowing your whore of a grandmother to be born and to ride your grandfather. Am I being disrespectful to your family? Yes. Because your being disrespectful to mine. Yet, do I seem to care that im being disrespectfull to your family? No. So before you say the military hasn't done anything for your then maybe you should look around you, because everything you have is because of a military action at some point in your countries history. And as far as us crying when one of our soldiers die.....well thats because we know he/she had the testicular fortitude to go out and fight and die for this country to provide fucking assholes like you with freedoms that your obv. taking for granted. Son, not only are you a failure in life, your a failure for your country. Even if you don't want to serve your country thats A-Ok! in my book--but not even supporting our men and women.....well thats crossing the line you stupid peice of shit.

And as far as the A-10 situation goes. Hell yeah I over-reacted and Im sorry about it. I over reacted maily because I have friends who are still over fighting for OUR FREEDOM hence the word FREEDOM you stupid mother fucker.

So for all you hippies out their....especially Think Harder.....Fuck Off.

Everyone is entitled to an opinion and thats just mine, just because you dont agree with it doesnt mean that you have get so abusive.

I really dont see the point of contiuing this argument as its never going to get anywhere, you have your view and I have mine, its as simle as that.

So before you start preching about respect again, think about other people right to speak what they want (this so called freedom you keep going on about...)

Quote:How the hell can you prove you wrote it yourself in the first place if its not registered?

Having the original copy is how you prove it. I've had an exhausting night explaining things to others so I won't go into it much further. Unless I need to.

Quote:I dont respect the military more than any other organisation.

Why? Their are many organizations that deserve our respect. The more important ones being those that make our lives better such as research organizations. And yes even the military.

Quote:Anyway why the hell should we respect the military they are no different from anyone else they dont have any extra rights why should we respect them?

How about because they saved us from a life of oppression? ie. World War II. But oh wait...

Quote:In my lifetime, I am 18 btw not 10, the millitary, either US or UK or otherwise have not done ANYTHING for me what so ever. Until the people commanding the military learn some respect for us, the public, then they can all go to hell, they dont have, or deserve, any more rights or respect or anything else over any other person on this planet.

Ever heard of history? Just because they haven't done anything in your lifetime (even there you're wrong, but anyways) I let you in on a little known thing... there was this gut named Hitler, that had world domination and ideals of a superior race on his mind. And he came very close to winning. The only reason were not all speaking German and listening to the "superior" blonde headed-blue eyed people is because the military was there to step in. (I didn't mean any offence to the German race, I was just explaining what could have happened)

Quote:If the leaders of this world did thier job properly then we wouldnt need a millitary to pursue wars that really dont have anything to do with them.

I must admit, I like your view of the world. Everyone is good, and their is no evil. However, this is reality. Diplomacy won't always work with everyone, and thats been proven in the past. You may let an invading country walk in while your government berates them, but it isn't stopping the leader of the opposing country from sending the m,ilitary if he wants your land.

Quote:and as for the US military can fuck right off, until they learn to shoot in a str8 line AT THE ENEMY and not themselves or Allies then they can go to hell

Umm, please give me an example of how this happens. I don't mean the odd example, I mean the fact that they hit allies every day, all the time. Sure accidents happen, but the unfortunate thing about humans is that we're not perfect. In any war a country has been responsible for some sort of friendly fire incident at one time or another. The UK, the US, et cetera.

Quote:Everyone is entitled to an opinion and thats just mine, just because you dont agree with it doesnt mean that you have get so abusive.

True, everyone is entitled to their opinion, but if someones opinion is based on ignorance, then others will always be there to correct them.

Umm, if your regarding me or Javafx, we're Canadian... I def. worded that one wrong.
I shouldve put

"See. I guess im not the only true blooded person on these forums that has respect for their country and the men and women who made the ultimate sacrifice for it"

Hehe much better! :oops:

I do you ignorant fuck. I wish we could take all the people that wanted protection and put them in a nice spot. Then take all the people who think the military sucks and they are wrong, to go line up against a wall, and some angry middle-easter's stone them to death.

Sorry, just a bit mad, haven't seen my brother since Christmas because he's busy protecting convoys of water to Iraqi towns in his humvee.
