You telling me you digged through the entire menu.ini to enable a bunch of checkboxes and buttons to enable a bunch of options that Renegade doesn't even use.....????

COOOOOOOOOOL!

(sorry, couldn't resist adding such irony, lol)

BTW, do you know if any of those options work? I assume most, if not all, of the hidden ones don't work, esspically for the ones for KOTH/CTF/etc, but are there any that do things?
