Option 1: Keep deleading yourself into thinking Gayspy is better, and keep ramming your head against the wall.

Option 2: Use WOL.

You most likely wont get any GameSpy help here.

Try asking a [Help] Guy in the Renegade Lobby of GameSpy.

My servers have been running in gamespy mode since the FDS was released (and a bit before)
with no apparent problems.

The major issues is Gamespy itself. Don't use it. Use ASE instead - a far better server browser.

Server admins can also use my util WOLSpy which will allow you to list on both WOL and
Gamespy (or ASE) at the same time. <http://www.beaconpedestal.com>
