This is what it looks like when I zoom in using my scope:

Just started when I was plaing a game today.

I know theres a glitch sometimes when your zoomed in and you switch weapons real quick it brings the scope over to the next weapon....a pistol with a scope rules!

Well im not going to unistall renegade to fix it, cause I like it makes sniping w/ scope realy easy

Ps: im not using any skins I didnt even know they had them.

And your a noob if you talk like that..

Notice how in my first post, i posted "No tint..", i wasn't bothered, but the next 3 or 4 posts were insulting him.. ?? Whats the deal? I bet you properly use a skin of some kind??

C:\Westwood\Renegade\Data\ < is where your skins are kept, you dont have to uninstall Renegade

It is very n00bish if you don't want to fix the no green tint on the scope, I mean, it's so much easier to snipe that way. And I already have a life.

YanoWhat is a scope skin and why is it bad

It takes the tint off and removes the black from the edge which makes it like a sniper quote

Hey it don't help you out much anyways... tried it once

Only n00bs use this

I've never used a skin like that, but I don't imagine it would help you too much. I can see where it would help you track the target better and not have to constantly zoom out/in so much, I guess there's a slight advantage.

DBBI know theres a glitch sometimes when your zoomed in and you switch weapons real quick it brings the scope over to the next weapon....a pistol with a scope rules! happens to me a lot... sniper pistol and railgun are awesome

the thing about the sniper pistol and railgun is once you go it you are stuck in zoom so that means you have to walk slowly everywhere with your zoom constantly on
