ok this ONLY works on windows 98 2000 and maybe 95 wont work on XP dont ask why

anyway get in position where the ob cant shoot you...now hold CTRL
and take a step forward..now dont let go..and now hold ALT and take a step forward... now press
DELETE 2 times 1..then 2.. and run into the oblisk...

if this doesnt work you did it wrong man...

hope this helps....

Another way to ob walk is walk from the tunnels, stand still then keep running. You have to have rank 1 on ladder system for it to work

You idiots have it all wrong.

First, to obby walk, you have to push down Alt. Then, as you are running, hit F4, then do a 180 degree turn and run backwards. I've done it countless times, and have totally Owned.

Wow, I just found the perfect way to obby walk.

First, turn your back to the obelisk, and hit Alt. Then, as you run forwards, jump and hit Tab. You should be able to glitch the obelisk shot, causing you to run to it and blow it up.

This is hilarious.

I can't believe people believe that ctrl+alt+delete will allow you to obby walk, it restarts your computer. My suggestion is to not believe everything you read.

In order to obby walk you must hit ~ then type %r%e%n then enter. After doing this the obelisk has a hard time targeting you, with this I have a 50% success rate.
