Does anyone know any good free screen capture programs? My print screen button never works and the current program I have makes all the text seem blurry and I can't read it. Can anyone help?

What type of keyboard do you have? Some keyboards have keys with multiple uses that require being switched over before you can use them (Mine has an F-Lock key), which may be why your Print Screen button doesn't work.

brent3000snaget is a good screen capture program

Yeh I use snagit aswell

You can get it here:

http://www.techsmith.com/download/snagitdefault.asp

It records whole screen, part of screeen, sound and other things.

I recommend this program.... but don't foget if your trying to get video from Ren your gonna need some gud specs.
