Use the first CD. I only use the first VD anymore since I only play MP. When you start it up and it asks you for the second CD, just click cancel and it will take you to the main menu.

Actually, one does exist for the current version of Renegade, I have it and am using it. I believe it was created by *****, though I don't remember where I found it. If I find the link I'll let you know.

Just CloneCd it to your hard drive and run it via Daemon Tools. I do that for all the games I play frequently, to prevent the cds from becoming scratched up.

I paid \$40+ dollars for my Renegade. The game is now something like \$10. Just get another \$10 and buy a new set. You are still going to get a great deal. :rolleyes:

On most game forums the first person to even SUGGEST a link to a no-cd patch is banned immediately.

This sounds awfully bogus to me. First, he said his CD was scratched, not WHICH CD, suggesting he doesnt even know there are two.

Um, NO, you did not ask if there was an official patch.

Why would there be, anyway? Gaming companies don't LIKE pirates. There are no "legal" no-cd patches in existence! If you scratched it, either repair it or get a new one.
