Sabotage the Torpedos by pressing 'e' on them, seek out the objective stars on the radar to find them.

You might have gotten access to the bridge when you're not supposed to. It can happen if a SBH comes out of the locked door to the bridge, you kill him, and run inside. You have to find the keycard before entering the bridge, or it will screw up the triggers for the rest of the level.

Meh, in the Jedi Academy beta there's this one level I wandered around for a good 2-3 hours, until I finally went past the proper are in the correct direction to activate the triggers necessary for me to move on to the next level.
