I can't go up. :rolleyes:

Pressing crouch send me down just fine, but pressing jump does nothing. So i'm sitting there at ground level getting ripped apart by the guys hovering above me. This may have something to do with the fact that I've revamped my controls a bit:

Crouch = C

Jump = X

Use/Enter/Exit = Spacebar

Could that cause a problem like this?

I'm running the latest patch version, and I've tried this in a few different maps, on different servers, and different aircraft, with no success.

Any help would be appreciated.

your crouch is the standard, and your jump is remapped.

did you set the controls and then update to the flying patch?

When I did, I had to go in and REMAP them again to get them to work properly when I had my stuff remapped to shift/enter.

No, I've never remaped after downloading the patch. I'll try that.
