When I try to install the game from the 2 cd's, it gives some kind of window on which I choose "install". Then the installation asks me to insert a "Game CD-ROM". But this is already in the cd-player.

Can anyone help me with this, since now I can't start installing the game!

Use CD1 to install the game

Insert CD2 once the game has been installed - Close down the Autorun window when it appears, and use either the shortcut on your desktop, or the shortcut in Program Files/Westwood/Renegade to start the game.

I tried to do that, but it doesn't work. When I insert CD1 and try to install the game, it asks for the Game CD-ROM. When I insert CD2, it still asks for that Game CD-ROM. What's wrong?

I tried doing that but, when I put in the serial and hit the install button, it said runtime error. Any suggestions?
