Im looking For a Bunch of Sites and mods that are looking for a way to spread thier name!

Im making a Model which will show off your AD. Ill put it Up with update now and then. Basically you can put it in your map and just show off.

Price? Free!

Requirements? Make it a Square and doesn't matter the size, but not over 400x400 pixels!(bigger=better.)(you can use your Sig things, but it might be blurry.)

Please just Post it here Or Msg me on MSN. name: Laser2150

Also i in a way have to thank Halo38, it was a inspirement.

Scoll For Pic of how this will work.

Edited.

Can you use my siggy pic to advertise Modern Warfare?

If you could also advertise our site: <http://modernwarfare.arm-ent.com> that would be great.
Thanks.

Just incase you Don't understand, i have a Picture to show you of what my intentions are:

Pic:

My Design Is Like that of a Purchase terminal, only that its more of a showcase. and on the bottom part it shows you how to reach the site (not that blurry ingame.)[/img]

it can't be a animation, HOWEVER, if you send each frame (JPEG only please,TGA also works.) i can get it to animate, but this works as a slideshowso don't expect fluentness. .

You're forgetting, however, that replacement models are only viewed by people who have it installed. :rolleyes:

I never said it was to be a replacement model. did i? :rolleyes:

Anyway, it would be a good idea to make it replace the PT, or some other sort of item. and i been modding for a year so i know people can't see it if they don't have it.

yes jpegs and jpgs are the same. (i think)

The reason gifs don't work is because only .TGAs and .DDS work.
basically the only way to have some sort of animation is to break down each frame and have them line up and use a fast Linear offset or a grid like im using.but so people can see all of them you would have to live with a 1Frame per second so all the other ads don't dissapper.

its the way the engine works, sorry.

but if you want something like a animation, just contact me (PM or MSN[Laser2150]) with each frame or just a banner.

i dont mind, animations arnt that important, 400 X 400 is enough space 4 me. but some apps treat JPGs and JPEGs diff, like geocities page builder. it recognizes JPGs, but not JPEGs. j/w

lol ok, wasnt worrying, btw
1 400x400 JPG comming up!

ill post/e-mail it 2morrow

The real reason is to be either

- 1) Just a Replacement of the PT so people can learn about new mods or sites.
 - 2) a object which a mapper could place just in a random spot to help other mappers, and such.
 - 3) something just to put out in somewhere where someone could just walk into. thats all.
-
