Use Divx Free version unless you needs the pro features which not a lot of people who play videos would use normally.

The free (not pro with adds which is free) version of DivX is ad free it just laks some of the thing you get with the Pro version. The spyware must be from something else.

Noo Gator came from divx here is something I found on their site.

"Why We Offer Ad-Supported Software

After we decided to offer the professional-level DivX Pro to personal users for a fee, there was still a portion of our team that wanted to do better. And you can't do better than free. So we are offering a no cost, ad-supported version of DivX Pro. We made this happen through an association with the Gator Advertising and Information Network (GAIN)."

So use Ad-ware to remove it
