It was good while it lasted but now theres a endless ammount of cheats aimbots wallhacks bigheads and 1 shot kills i was playing last night and every single server i joined had at least 1 person using one of these hacks and this is no lie seems like the renegade community is destroying itself. I reccon if this carries on the way it is doing EA will have it shut down i hoping that someone brings out some sort of punkbuster for renegade thats if its not already to late. Everyone has cheats WTF???

That's funny... I just got finished playing on at least 3-4 different servers (all dedicated and well known) and none of them had anyone cheating in them. And if they did... those people who were really sucked because it didn't show.

No I'm pretty sure they were cheating with their 1 shot kills and I'm not just talking about infantry vehicles too. I'll keep this thread updated with some screenshots to prove my point...

Guess what, there's a few things wrong with this thread.

1. This doesn't belong in the modification forum.

2. Renegade isn't dead.

Stop posting this garbage, thank you - the administration.
