there is one version in the official scripts.dll (GTH_CTF_Object2) or one in the custom scripts.dll (TDA_CTF_Controller).

your choice:

official - >Ren dir
unofficial - > http://sourceforge.net/projects/rentools/

GTH_CTF_Object2 was bugged when I tested it. You can capture the flag fine but it doesn't end the game after the limit is exceeded. Also it may have to do with the fact i don't know what these parameters do:

Flag_Stolen_Event_ID 25000
Flag_Stolen_Object_ID
Flag_Lost_Event_ID 25001
Flag_Lost_Object_ID
Flag_Saved_Event_ID 25002
Flag_Saved_Object_ID
Flag_Returned_Event_ID 25003
Flag_Returned_Object_ID
