I hosted a game today and whenever the last building was destroyed my comptuer would crash
I uninstalled renegade and went to reinstall it and when i click install on the autoplay screen
nothing happens.

Anyway to fix that?

That kept happening with my new PC till I updated all my drivers....

But if your haveing problems with the install try doing the alternative install.

http://www.cncnz.com/files/renegade/utils2.shtml#reninstall

BTW you ever heard of the tech support forum? :rolleyes:

I get this error message when i click install:

"object variable or with block variable not set"

---

i saw the read me but do i really have to install this on another comp and get the encripted cd key? : /

I only asked for 1v1's when
A: Somone called me a n00b or
B: The excuse is they dont feel like gathering people for a big game

 :rolleyes: :rolleyes: :rolleyes:

I had something similar happen a long time a go.
Put your screen resolution to it's lowest settings and give that a try. It worked for me.

Anyway to fix that?
Almost same thing happened to me, excet that when I click install, it says "This program has performed an illegal operation and will be shut down", and in details, it says this "SETUP caused an exception c0000006H in module SETUP.EXE at 0177:004547e0.

or it says:
"Renegade setup error"

Help someone please!!! What the hell am I supposed to do?
